

Dear Customer,

We, DIAsource ImmunoAssays S.A., is proud to announce the publication of a book chapter entitled: **Vitamin D Testing – Where Are We and What is on the Horizon?** by our **Principal Scientist, Dr. Nicolas Heureux**.

This very interesting book chapter was published in Advances in Clinical Chemistry, Volume 78. (<http://www.sciencedirect.com/science/bookseries/00652423/78/supp/C>) and features the following topics:

1. Introduction
2. Measurement of Vitamin D Metabolites
 - a. Measurement of 25OH Vitamin D
 - i. Physical Detection Methods
 - ii. Immunoassays
 - b. Measurement of 1,25(OH)₂ Vitamin D
 - i. Physical Detection Methods
 - ii. Immunoassays
 - c. Free and Bioavailable 25OH Vitamin D
 - d. 24,25(OH)₂ Vitamin D
 - e. C3-epi-25OH Vitamin D
3. Future Directions
 - a. Improvement of existing methods
 - b. Novel assays
4. Conclusion

This achievement shows our strong commitment and contribution to the field of Vitamin D measurement and is a great recognition amongst the scientific community. We will continue our work to identify new forms of Vitamin D metabolites, to develop new antibodies and assays, to understand the nature and the clinical importance of different forms of 25OH Vitamin D (D2, D3, Total, Free, Bioavailable) and 1,25(OH)₂ Vitamin D and to use this information to establish and commercialize new assays.

If you want to receive more information, please contact us now:
